

plant

root

stem

leaves

seed

deciduous

evergreen

a living thing that **grows in one place**, such as an oak tree, a sunflower or a tomato plant

the part of a plant that acts as an anchor, fixing the plant into the ground, and they also **absorb water and minerals** to help the plant to grow

the part of the plant that grows **above the ground**; the leaves and flowers grow from the stem which also **transports water** and minerals around the plant

a plant's leaves absorb sunlight and turn it into energy that the plant uses to grow

the small part of a flowering plant that grows into a new plant

a tree that sheds its leaves during autumn

a tree that keeps its leaves all year around

## decidious trees

lose their leaves during autumn

e.g., oak tree

## evergreen trees

keep their leaves all year around

e.g., fir tree
